Requirement Analysis – Customer Journey Map

Date	04 april 2026
Team ID	SWTID-2026-2136
Project Name	Automating Employee Data

Scenario

Managing employee data using an automated system in ServiceNow (from data upload to usage in incidents).

Steps / Journey

1. Enter (Start)

- **HR/Admin identifies need to manage employee data**
- **Prepares employee data file (Excel/CSV) Interactions:**
- **Excel file, local system**
- **HR/Admin**

Goal:

Help me upload employee data easily

Positive:

- **Easy to prepare data**

Negative:

- **Manual data errors**

Opportunity:

- **Provide data validation before upload**

---

2. Browse / Import Data

- **Upload file into ServiceNow using Import Sets**
- **Create staging table**

Interactions:

- **ServiceNow platform**
- **Import Set module Goal:**

Help me import data without errors

Positive:

- **Bulk upload saves time**

Negative:

- Mapping confusion

Opportunity:

- Provide clear field mapping guide

---

3. Engage (Transform Data)

- Create Transform Map
- Map fields to sys_user table
- Execute transformation

Interactions:

- Transform Map
- System database

Goal: Help me correctly store employee data

Positive:

- Automated insertion

Negative:

- Errors if mapping is wrong

Opportunity:

- Add validation rules

---

4. Use System (Application Stage)

- Use dot walking in Incident form
- View employee details (Department, Email, Manager)

Interactions:

- Incident form
- Users

Goal: Help me quickly access employee details

Positive:

- Real-time data display

Negative:

- Complexity for beginners

Opportunity:

- Simplify UI

---

5. Exit (Completion)

- Data successfully stored and used
- Incidents assigned to employees

Interactions:

- **ServiceNow users Goal: Help me ensure system works correctly Positive:**
- **Efficient workflow Negative:**
- **Need testing Opportunity:**
- **Add automated testing**

---

6. Extend (After Use)

- **Data updated automatically**
- **System improves over time Interactions:**
- **Admin, system Goal: Help me maintain updated records Positive:**
- **Reduced manual effort Negative:**
- **Dependency on system Opportunity:**
- **Add monitoring & alerts**
