Ideation Phase
Brainstorm & Idea Prioritization Template

Date	04 January 2026
Team ID	SWTID-2026-2136
Project Name	Automating Employee Data
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement:

In many organizations, employee data management is handled manually, leading to:

- Data entry errors
- Duplicate records
- Time-consuming administrative work
- Inconsistent and outdated information

There is a need for an automated system that can efficiently manage employee records, reduce manual effort, and ensure data accuracy.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstormed Ideas:

1. Manual Excel-based employee tracking
2. Automated data import using CSV/Excel files
3. Use of ServiceNow Import Sets for data loading
4. Creating Transform Maps to map data into system tables
5. Automating employee onboarding process
6. Auto-assigning roles and departments
7. Using workflows for employee status updates
8. Displaying employee details using dot walking
9. Implementing validation rules for data accuracy
10. Centralized employee database system

Grouping of Ideas:

- **Data Input & Storage**
  - Excel/CSV file
  - Import Sets
  - Staging table
- **Data Processing**
  - Transform Maps
  - Field mapping
  - Validation rules

- **Automation Features**
    - Role assignment
    - Status updates
    - Workflow automation
- **User Interface & Display**
    - Dot walking in Incident form
    - Manager & department visibility

Step-3: Idea Prioritization

Selected Final Idea:

Automating Employee Data using ServiceNow

Reason for Selection:

- Reduces manual work
- Improves data accuracy
- Ensures consistency across records
- Provides real-time data updates
- Enhances efficiency in employee management

Priority Level: High
