Empathy Map Canvas

User (Target Customer):

HR/Admin Staff & Organization Managers

---

1. Says (What the user says)

- "Managing employee data is taking too much time."
- "There are too many errors in records."
- "We need a faster system to update employee details."
- "It is difficult to track employee information manually."

---

2. Thinks (What the user thinks)

- There should be an automated system
- Manual work is inefficient
- Data should be accurate and updated in real-time
- Technology can simplify this process

---

3. Does (User actions)

- Enters employee data manually in Excel or systems
- Updates records repeatedly
- Checks for errors and duplicates
- Searches for employee details when needed

---

4. Feels (User emotions)

- Frustrated due to repetitive work
- Stressed because of errors
- Tired of manual processes
- Worried about data accuracy

---

5. Pain Points

- Time-consuming manual data entry
- High chance of human errors
- Duplicate and inconsistent data
- Difficulty in tracking updates

- Lack of centralized system

---

6. Gains (User needs / expectations)

- Automated data management system
- Accurate and error-free records
- Faster data processing
- Easy access to employee details
- Improved efficiency and productivity
